# **Scientist Development Award**

The mission of the Rheumatology Research Foundation is to advance research and training to improve the health of people with rheumatic disease.

This award is designed for individuals in the **early stages of their career** or those without significant prior research experience who plan to embark on careers in biomedical and/or clinical research in arthritis and rheumatic diseases. The purpose of this award is to provide support for a structured research training program for rheumatologists or health professionals in the field of rheumatology.

This mentored career development program provides support for salary as well as research and/or education costs for the early years of research training in an environment where trainees may interact with established investigators in a clinical unit involved in the care of rheumatic diseases. The goal of funding at this level is to provide an opportunity for young scientists to embark on focused research and research training that will allow them to be competitive for the next level of career development awards. Through this award, the Foundation provides a means for ensuring more qualified, highly-trained investigators in the field of rheumatology.

Note: Junior investigators with a faculty appointment who are between the period of completed fellowship training and establishment as an independent investigator should consider applying for the Investigator Award.

Award Amount: Up to \$225,000 for up to 3 years

All applications must be submitted by 5:00 PM ET on the deadline day through WizeHive http://app.wizehive.com/apps/sda

Application Deadline			
July 1, 2016			
Notification			
December 1, 2016			
Award Term Begins			
July 1, 2017			

# **Guidelines**

All applicants and award recipients must abide by Foundation Awards and Grants Policies at all times. A list of current policies is available at <a href="https://www.rheumresearch.org">www.rheumresearch.org</a>.

Applications must have relevance to the Foundation's mission to improve the health of people with rheumatic disease.

## Eligibility

Applicant must meet citizenship and other eligibility requirements as outlined in the Awards and Grants
policies.

Applicant must be an ACR or ARHP member at the time of submission and for the duration of the award.

ACR members must meet the following criteria:	ARHP members must meet the following criteria:
<ul> <li>Have earned a DO, MD, or MD/PhD degree and by the start of the award term have completed at least one year of training in an ACGME accredited rheumatology training program</li> <li>Individuals more than 5 years from the beginning of fellowship (or 6 years for pediatric rheumatologists) at the time of award start may not apply</li> <li>MDs and DOs who are not licensed to perform clinical care may not apply.</li> </ul>	<ul> <li>Have earned a PhD*, DSc, or equivalent doctoral degree</li> <li>Must be within 3 years of terminal degree at the time of award start</li> </ul>

_	
	Applicant must be affiliated with an accredited graduate or medical school.
	Be able to commit at least 75 percent full-time professional effort to research, career development, and other scholarly activities. Candidates may not spend more than 25 percent effort in clinical and/or teaching activities.
	teaching activities.
	Receive acceptance by a mentor who will oversee the training and research experience.

If you have questions about your eligibility, please inquire by email to foundation@rheumatology.org or

404-365-1373 before preparing your application.

#### **Review Criteria**

Applications are rated on the following criteria:

- Relevance of the proposal to the Foundation's mission to improve the health of people with rheumatic disease
- 2. The proposed research project's scientific merit.
- 3. The appropriateness of the proposed project as a mechanism for developing the applicant into an independent rheumatology investigator.
- 4. The environment in which training will be conducted, specifically the mentor, the unit, the available facilities, and the potential for inter- and extra-departmental interactions.
- 5. The applicant's background, training and potential to develop into a productive research scientist.
- 6. The institutional commitment to protect applicant's time for research and continued education.
- 7. The applicant's submission of a strong methods section with clear statistical and power analyses where appropriate.

Prior experience and publications are not required, but will be considered as supportive qualifications of the applicant. Institutional commitment and plans for the advancement of the applicant toward becoming an independent investigator will be important in review of this award.

### **Award Terms and Funding**

Awardees must devote at least 75 percent full-time professional effort to research, career development, and other scholarly activities with assurance that no more than 25 percent full-time professional effort will be spent on clinical and/or teaching activities. At least 50 percent professional effort must be devoted to the proposed project in year 1.

Awardees cannot have ever received funding as principal investigator by any of the award mechanisms outlined in the Eligibility section at the time funding for this award begins. Should the awardee receive any of the awards mentioned above during the Foundation award period, they must notify the Foundation.

Awards are funded for 2 years; however, there is a possibility for renewal in year 3. Renewal is contingent on submission of an annual progress report showing substantial accomplishment and progress toward benchmarks specified in the original application. In order to be considered for year 3 funding, awardees must also provide evidence of a submitted application for a career development award (e.g., NIH K series award, VA Career Development Award, or Rheumatology Research Foundation Investigator Award), or NIH R series award. Renewal in year 3 is competitive, and subject to approval by the Foundation's Scientific Advisory Council.

The award will be paid directly to the sponsoring institution and will be disbursed in two equal installments in July and January of each award year. The award must be directly applied to the individual awardee's salary and/or research and educational costs only as outlined in the approved budget. Indirect costs are not allowed.

Financial support will be provided as outlined below.

	Salary	Research Costs	Award Total (maximum)
Year 1	Up to \$50,000	Up to \$25,000	\$50,000
Year 2	Up to \$50,000	Up to \$25,000	\$75,000
Year 3	Up to \$75,000	Up to \$25,000	\$100,000

**Salary:** Salary will be based on levels set by the institution. Awardees may receive salary supplementation from other sources; however the extent of this supplementation must be stated on the application and the applicant must notify the Foundation if other support is received during the award.

**Research Costs:** Allowable research costs include the following types of expenses: (a) research supplies, equipment and technical personnel; (b) tuition and fees and books related to degree programs, such as a MPH, MCR or other didactic courses appropriate for career development; (c) travel to research meetings or training; and (d) statistical services including personnel and computer time.

**Note:** Federal employees may not receive funding while they are employed at a federal agency (e.g., NIH), however these individuals may apply and if successful, receive the award (i.e., in name only, no funds). In addition, should the awardee move to a public institution, they may submit for an award transfer, subject to approval by the Scientific Advisory Council.

## **Application Instructions**

Before starting the online application, please read the Instructions for All Awards.

### **Applicant Information**

You will be asked to confirm your eligibility and provide contact information in this section. In addition to the applicant information requested above, you will be asked to upload the following documents:

#### **Applicant Biosketch in NIH Format**

Limited to five pages; should include any pending support.

#### **Mentor Information**

You will be asked to identify your primary mentor and provide contact information in this section.

An applicant may have more than one mentor; however, at least one must be a rheumatologist or rheumatology professional and a fellow member of the ACR or ARHP. Qualifications of the mentor will be judged based on the biosketches and the specific commitment of the mentor to the applicant's proposal. Applicants with two or more mentors need only to identify the primary and secondary mentors. Additional mentors may be listed in the application, but biosketches are not required for these individuals.

This requirement does not exclude having a primary research mentor outside a rheumatology division, but does require that the trainee's academic career development has input from rheumatology faculty (e.g. rheumatologist as a co-mentor). Mentors must have sufficient independent research support to cover the costs of the proposed research project in excess of the allowable costs of the SDA. The use of co-mentors to achieve the goals of the program is strongly encouraged.

### **Mentor Applicant Biosketch in NIH Format**

Limited to five pages; should include any pending support.

### **Project Information**

The information in this section is general information about the grant submission.

### Project Title

Make your title specific and detailed. It should clearly state the topic of your proposal and is limited to 81 characters, including spaces between words.

### > Abstract (limit to 300 words)

Succinctly describe the hypothesis to be tested, the specific aims or global objectives of the project and the expected results.

### Project Narrative (2-3 sentences)

Briefly describe how your proposed project is relevant to the Foundation's mission to improve the health of people with rheumatic disease.

Specifically, please explain how your project will address at least one of the following: a) increase patient access to care, b) develop future treatments and cures, c) demonstrate or improve the value of rheumatology care; and/or d) expand the impact of rheumatology. In this section, be succinct and use plain language that can be understood by a lay audience. The Project Narrative is made public for all awarded grants and used by the Foundation for marketing efforts.

#### Primary Study Material and Method

Please select one or more of the checkbox options in the online application. This will be used to assign your application to the appropriate study section.

#### Research Category and Classification

Information provided in this section will help to ensure each application is assigned to the most appropriate study section.

### > Keywords

Choose three keywords that accurately describe the project. If the application focuses on a specific disease, please include it as a keyword.

### **Research Award Assurance**

By checking this box, the applicant assures that the proposal is in compliance with institutional guidelines as provided by the sponsoring institution's clinical and research review boards. All research proposals including human subjects, laboratory animals and recombinant DNA techniques must show documented compliance with institutional guidelines. Copies of approval notices by the institutions IRB, IACUC and/or biosafety committees must be provided as appropriate once awarded.

### **Required Documents**

#### **Research Proposal**

Limited to 10 pages including figures, tables, and references.

The applicant is solely responsible for writing the proposal. This section should be presented in such a way that it is clear that the applicant understands the project. **Note, the mentoring committee (see mentoring** 

committee section for requirements) is required to meet PRIOR to application submission and sign off that they have read and reviewed the applicant's research proposal.

The following questions should be addressed: What do you intend to do? Why is the work important? What has already been done? How are you going to do the work? Describe in detail:

- A. **Specific aims (limit one page):** State the overall research objectives and specific aims for the proposed project.
- B. **Background (limit three pages):** Briefly summarize the background to the proposal. Include only key references to prior work that constitutes the foundation of the proposal and any preliminary background work by the applicant.
- C. **Experimental design and methods:** Summarize the essential features of the experimental design and methodology. Include a specific plan for data and statistical analysis as well as a clearly defined power analysis where appropriate. Preliminary data may also be included in this section.
- D. Significance (limit one page): Include a statement on the relevance of the proposed project to the prevention, control or cure of rheumatic diseases. Describe how the successful completion of the proposed project will add to a better understanding of rheumatic diseases. State the importance of the research described in this application by relating the specific aims to the broad, long-term objectives.
- E. **Future Direction:** Include a statement summarizing the potential impact and outcomes that this project may have on your career and the field of rheumatology. Please outline how successful completion of the aims outlined in this award will position you for future funding.
- F. Selected references

#### **Benchmarks of Success\***

Download, complete and submit the Benchmarks of Success template. See example of the template below.

Benchmarks of success should be included for the formal coursework and the research project as outlined in the research proposal. Examples include: timeline for research proposal, submission of abstract(s) and/or publication(s). \*Timeline for other grant submission (e.g., NIH, VA, Foundation, etc. career development awards) is a required benchmark.

### **Budget**

Download, complete and submit the Budget Template. See example of the template below.

The budget should indicate the expected amount of salary from the award, including fringe if requested. Budgets must comply with the award terms as outlined on page 3 of this application.

#### **Distribution of Time**

Download, complete and submit the Distribution of Time Template. See example of the template below.

Give the percentage of time to be spent on academic activities during the award period. List all research, clinical, teaching and/or administrative activities. Clinical work related to the proposed research may be considered part of the research activity, but typically this type of clinical activity would not generate revenue.

Awardees must devote at least 75 percent full-time professional effort to research, career development, and other scholarly activities during the award term, with at least 50 percent to this award in the first year. Candidates may not spend more than 25 percent effort in clinical and/or teaching activities.

### **Research Training Plan**

Limited to two pages.

This item must be completed by the mentor. Describe in detail the applicant's role in the proposed project and outline other activities that will be used to aid the applicant's development into an independent investigator. Describe any coursework or other plans for obtaining specific research methodology training.

### **Mentoring Committee**

Download, complete and submit the SDA Mentoring Committee Form.

This component of this award is designed to aid the awardee by providing critical constructive review coupled with friendly advice and counsel, giving access to established researchers and other untapped resources. The committee will help awardee stay on track with regard to project benchmarks and proposed research training plan, as well assist in preparing timely and informative annual progress reports. Note, the mentoring committee is required to meet PRIOR to application submission and sign off that they have read and reviewed the applicant's research proposal.

### **Mentor Letters of Support**

The primary and secondary mentors must provide letters of support detailing the following(as applicable):

- a. Details of their previous experience as mentors
- b. Features of their training program and the institutional environment that will be relevant to the application
- c. Financial and other resources available to support the applicant specific to their project
- d. Description of how they will provide mentoring to the applicant
- e. The roles of any additional mentors mentioned in the application
- f. Agreement to participate in the project and confirmation regarding availability of time to commit to the project
- g. Description of applicants qualifications and track record of productivity

**Limited to two pages for primary mentor and one page for secondary mentor,** if more than one mentor; statements should be merged to create one file for upload.

### **Letter of Institutional Support**

The division chief, department chair, or equivalent institutional official must provide written assurance of the following:

- Quality and relevance of the environment for scientific and professional development of the applicant, commitment to the scientific development of the candidate and assurances that the department intends the candidate to be an integral part of its research program beyond the duration of the proposed award.
- Commitment to an appropriate balance of research and clinical duties, including a commitment of at least 75 percent effort to research and scholarly activities, including specific effort to the award as outlined in the application. If the applicant is currently a rheumatology fellow, include assurance that program requirements, as specified by the Residency Review Committee, will be fulfilled.

#### **Additional Uploads**

Additional documents which support the grant application may be uploaded. Letters of support from collaborators if applicable should be included here.

Note: The Foundation does <u>not</u> require official signature from an authorized institutional research office at the time of application. However, many institutions require an application to be reviewed prior to submission. Please check with your research office for your institution's requirements.

## **Checklist of Uploads**

Use this for reference when finalizing application materials.

Note: after a document is uploaded, you will not be able to view. Please double check all documents prior to upload. A PDF of your complete application will be emailed to you following the submission deadline for your reference.

## **Benchmarks for Success\***

The benchmarks (expected status of the project at various points in time) included in your original application will be used to evaluate progress. The milestones should reflect the specific aims of the proposal and be presented within the context of measurable outcomes. \*Timeline for other grant submission (e.g., NIH, VA, Foundation, etc. career development awards) is a required benchmark.

### **Scientist Development Award Mentoring Committee Requirements**

### **Purpose**

The mentoring committee is designed to aid the awardee through critical constructive review coupled with friendly advice and counsel. The mentoring committee Chair is envisioned to be yet another individual the awardee can turn to for advice on larger issues such as overall research direction and insight.

The mentoring committee should meet to review the applicant's research plan prior to submission, and meet subsequently throughout the period of the award.

#### Composition

The mentoring committee should be a multidisciplinary committee composed of 4 total members of the university faculty who will function as mentors and advisors to the awardee. The committee must contain at least one member NOT affiliated with the division in which they belong. The mentoring committee should be constructed by the awardee and their primary mentor. Composition of the committee should consist of those mentors at the institution who will play a vital role in the research endeavors. The committee will be chaired by a member of the committee who is NOT the awardee's primary research mentor and not the division or department head.

### Meetings

Prior to application submission, the applicant should meet with committee to review the research plan. Documentation of this meeting must be included with the application.

If the applicant is selected for funding, the committee should convene for one hour at least twice a year during the funded project period. At each meeting, the awardee will be expected to give a **formal 20 minute presentation** of their work accomplished to date and plans for the future. This will be followed by 20 minutes of questions and comments by the committee for the awardee. This 40 minute period will then be followed by a 10 minute period where the awardee is absent and the committee can discuss any concerns with the awardee's progress to date. The committee will spend the final 10 minutes of the meeting presenting the evaluation of the group and offering advice for successfully working towards the awardee's stated career goals and successful completion of the award. The awardee is encouraged to contact the committee as a whole or individually via e-mail, telephone or individual meetings throughout the award period with concerns or questions.

#### **Annual Reports**

Annual progress reports will be due each spring (no later than April 1 each year). It is expected that the mentoring committee will play a large role in the completion of a succinct, informative and timely progress report, as well as an informative final report at the end of the award period. The mentoring committee will be required to provide sign-off on all reports, indicating they have carefully reviewed the reports and provided feedback to the awardee. Please also include the mentorship evaluation form with your yearly reports.

#### Goals

The result of this mentoring process should be a project that received great support, and was kept on course. The Foundation should then receive two (three if a third year is granted) detailed and informative progress reports. The research years should have been devoted to accomplishing the original aims, goals and benchmarks stipulated in the original application (if not changed by the mentoring committee). Below are some examples of products that may result from this process:

Peer-reviewed publication (s) in which the awardee played a substantial role

- Presentations at scientific meetings based on the project
- A thesis or dissertation written in connection with the pursuit of an advanced degree
- Grant applications to other institutes, agencies, etc., that has been accepted or favorably reviewed
